COLOUR CODES EXPLAINED

The aim of a colour coding system is to prevent cross contamination from one cleaning area or surface to another.

BLUE

General Low Risk Areas
Public Areas
General Cleaning.

RED

General Washroom
Toilets, Urinals etc.

YELLOW

Critical & Isolation
Disinfected areas.
Clinical Waste

GREEN

General Food & Bar
Kitchen
Recycling

pH value scale:

Explanation and examples:

- 0: Concentrated hydrochloric acid
- 1: Gastric juice, battery acid, sanitary cleaner
- 2: Citric acid, rust remover
- 3: Vinegar, lemonade
- 4: Cola, sauerkraut, various fruit juices
- 5: Human skin, sour milk, mineral water, beer
- 6: Milk, saliva
- 7: Chemically pure water, blood, neutral detergent
- 8: Clean tap water
- 9: All-purpose cleaner
- 10: Basic cleaner for linoleum, rubber and rubber floors
- 11: Basic cleaner for PVC
- 12: Strong basic cleaner for PVC
- 13: Soft soap, industrial cleaning products
- 14: Pipe cleaning products, grill cleaners

PRODUCT CERTIFICATIONS

Quality Certification ISO 9001-2008
Environmental Certification UNI EN ISO 14001

Plastic Second Life - Products made from recycled plastics
This certification "Plastic Second Life" is a system of environmental product certifications dedicated to materials and articles made from the use of waste plastics. It is the first Italian and European brand dedicated to recycled plastic. It is a certification that introduces quality in plastic recycling and traceability of recycled materials. This mark comes from the need to make more visible and more easily identifiable goods in recycled plastics. .

Product certification valid for a range of textile products

Ecolabel UE - Obtained for many mops & flat mops from the European Union Certification that rewards the best products with low environmental impact, distinguishing them from their competitors.
EU Ecolabel for multipurpose and sanitary cleaners
EU Ecolabel is a label acknowledged by all member states of the EU as well as by Norway, Liechtenstein and Iceland. The voluntary symbol which was introduced in 1992 (Council Regulation (EEC) No.880/92) has gradually become a reference for consumers who want to contribute to pollution reduction by buying more environmentally friendly products and services. The EU Ecolabel helps consumers to identify products that have a reduced environmental impact throughout their life cycle and therefore commit to environmental sustainability.

DIN EN 1040

Quantitative suspension test for the evaluation of basic bacterial activity of chemical disinfectants and antiseptics.

DIN 18032

DIN 18032 is a standard used in the constructions of sports halls whether for school sports, competitive sports, clubs sports, mass sports, amateur sports and sport for people with special needs. The standard also formulates requirements for cleaning, maintenance and slip resistance.

DVG List of disinfectants

The "Deutsche Veterinärmedizinische Gesellschaft" (German Veterinary Medical Society - DVG e.V.) is the scientific society of veterinary medicine. The committee "disinfection in veterinary medicine" of the DVG releases lists of disinfectants which have been tested according to the guidelines of the DVG and have been found to be effective. Found in 1951, the DVG is the oldest organisation of veterinary medicine in Germany. Veterinarians from universities, industry, public authorities, ministries, research groups under the auspices of the DVG.

Tony Field

When I started Wipeout I always believed there was 3 key components needed for a successful business

- 1. Suppliers: By forging long term partnerships you get delivery and continuity of product when needed without having to ask. I would like to say a huge "Thank You" to all without showing bias to anyone of you.*
- 2. Customers: Without you great people appreciating not just our service, training and knowledge of cleaning over the years, but incredible support and loyalty during some difficult and challenging times Thank You with all my heart. It has been a pleasure solving problems sometimes through trial and error, sure isn't that what demonstrations are for.*
- 3. Staff: We have been truly blessed over the years with some great characters that have helped us build and develop the company and move forward into a new era under the stewardship of Rachel and Anthony, therefore moving this business into the next generation. Succession is an extremely difficult thing to do in business but these two have made it look easy in a time when many small companies like ourselves have struggled.*
As you all know I can talk a lot, lol. I have to say to everyone whether a supplier, customer or colleague I am truly grateful for all the fantastic memories you have given me, there is many stories I can tell and plenty of you know about but I am certainly not putting them in writing I might get arrested haha!. Again Thank You everyone for your continued support and I look forward to another 30 years please God.

Rachel Martin

I have been with Wipeout for many many years now! and have worked and learned about the business and most aspects of it over that time, I am honoured and delighted to now be Managing Director and along side Anthony and the fantastic team of staff we have.

I am excited about how we are moving forward. Our team is made up of all generations, some wise old owls and some energetic young pups with everything in-between, and everyone brings something different to the table and has different ideas, this all leads to a great team dynamic and ultimately a better service for our customers. I have also learned that in business you are only as good as you last delivery, so we strive to make each and every delivery excellent.

We have also taken on board the changing concerns of our customers over the years and are working hard every day to make our company more environmentally friendly, the preservation and protection of our environment is important to us, the majority of our Plastics are second life and recyclable, our paper products are FSC® certified paper that has been harvested in a responsible manner, and our chemicals where possible are highly concentrated, environmentally friendly and we work in close cooperation with well-known raw material manufacturers.

Anthony Field

I always knew I wanted to go into the family business from a young age as I saw it as huge opportunity and always wanted to make the family proud. My goal from day one was to take the company into the second generation and bring it into the third. Since I started in 2014 there has been a lot of ups and downs. I have been extremely blessed with the team in Wipeout as we all have the same common goal to succeed in every aspect of life and learn a lot from each other. Through the tough times since Tony retired we have all chipped in and there seems to have been an effortless transition, which none of us thought it would be. So I want to say a massive thank you to all the staff.

Also a massive thank you to all the customers that have believed in me from the start, I appreciate the business and loyalty you all have given us. Wipeout will never let you down as we believe our service is second to none!

Lastly I just want to mention we would be no where without our suppliers who also have supported us throughout the years. Thank you for consistently giving us the best products and training on up to date cleaning methods. With your help it benefits ourselves and our customers as we can pass this knowledge on.

Dosage: 100-200ml/10ltr
pH Value: 12

Prices exclude Vat.

<p>POLISH APPLICATION</p> <p>ITEMS REQUIRED:</p> <ul style="list-style-type: none"> • SAFETY WEAR & SIGNS. • CLEAN MOP OR POLISH APPLICATOR • MOP BUCKET OR TRAY 	 <p>Put on safety wear. Place safety signs. Ensure floor is clean and dry.</p> <p>1 Pour polish into bucket or tray. Use plastic liner to protect bucket.</p>	 <p>Place mop/applicator into polish. Lightly squeeze surplus from mop/applicator.</p> <p>1 Spread polish thinly and evenly in NORTH to SOUTH direction. Leave 6" gap at floor edge. (this will avoid build up) Leave to dry thoroughly, approximately 30 minutes.</p>	 <p>Apply further coat of polish thinly and evenly at right angles to first, i.e. WEST to EAST over total floor area. Leave to dry thoroughly, approximately 30 minutes. The floor may require more than the normal 2 coats of polish, depending on age, porosity of floor and the system being worked. Never put unused polish back in container.</p>
--	--	---	---

AUTOMATIC

Self Gloss emulsion based acrylic and polyethylene waxes for all types of water resistant flooring, suitable for use by amateurs and professionals. When maintained correctly this product has a 6-12 month life span. Not for use on unsealed parquet, cork and timber floors, Automatic floor polish offers the benefits of easy maintenance, wipe clean using microfibre mops or high speed spray buffing.

CODE:
W4521 - 1ltr € 9.76
W452 - 5ltr €31.70
 Dosage: Pure
 pH Value: 8

SEALER

Primary dispersant sealer based on heavy polymers for sealing highly porous floors, When used correctly this product offers excellent waterproof characteristics especially for linoleum, rubber and asphalt with lining as it has high filling power. Not Removable. Also excellent used for the pretreatment of rough, porous, absorbent floor coverings. Pour pure on the cleaned floor and distribute evenly. After drying, the hard coating is applied, e.g. with Strapa.

CODE:
W4561 - 1ltr €18.00
W456 - 5ltr €52.00
 Dosage: Pure
 pH Value: 8

STRAPA

This high quality, hard wearing, Non-slip, Self glossing, water resistant polymer dispersion for coating all types of water resistant floorings such as linoleum, pvc, poly olefin, etc. as well as sealed parquet, wooden and laminate floorings. Its excellent anti slip properties along with the easy removal of heel and scuff marks make it ideal for use in high traffic area. When maintained correctly this self glossing polish has a great long life span (12 months), This high quality floor polish can also be maintained using high speed burnishers whilst not affecting the products long life integrity.

CODE:
W4571 - 1ltr €16.00
W457 - 5ltr €62.00
W45710 10ltr €124.00
 Dosage: Pure
 pH Value: 8

POLYTHERM

This incredible polish really is the Daddy in our range. It has a guaranteed minimum 12 month life when maintained correctly thanks to the use of our new polyurethane acrylics which give exceptional wear resistance due to its viscously elastic film this offers good heel, tyre and scuff mark resistant floorings leaving an exceptional wet look, gloss finish whilst at the same time offering excellent anti slip properties. Unlike conventional floor polish, Polytherm can also be maintained using a high speed burnisher whilst not damaging or affecting the life of the product.

CODE:
W0991 - 1ltr € 22.50
W099 - 5ltr €115.00
W09910 10ltr €200.00
 Dosage: Pure
 pH Value: 8

LAPICUR

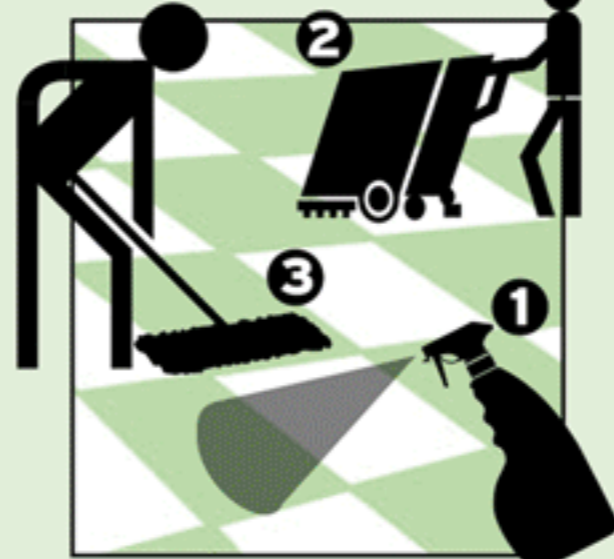

This Polish was designed to give a high gloss finish to very porous such as marble, terracotta, natural and artificial stone floors indoors as well as outdoors. Thanks to its deep filling capabilities it closes pores and forms a non-slip, hard-wearing protective film, can be polished at high speed. For coating stone coverings - Not suitable for glazed tile coverings. Apply neat evenly 2-4 times in a cross method on thoroughly cleaned surfaces and allow to dry. Subsequent polishing increases the shine!

CODE:

WINDOW CLEANING TOOLS

WINDOW WASHERS

Our Window Washers consist of a support T bar and an acrylic sleeve. They come in complete in four sizes 25cm, 35cm, 45cm & 55cm. And replacement support and sleeves can be purchased separately making these a very cost efficient product.

The window washer grants a big absorbance and has short yarn in order to avoid the loss during the washing cycle, it can be also used with telescopic poles to reach the highest surfaces without the use of ladders. The washer sleeve can be removed from the Tbar after use and washed in a standard washing machine using temperatures up to max 40°C, normal detergent for textiles can be used and we recommend not using fabric softener or bleach/chlorine products, to prolong the life of your washer sleeve.

We also have an optional jointed support bar, however this only comes in the 45cm size.

WINDOW CLEANING TOOLS

WINDOW SQUEEGEES

Our range of Window Squeegee's come with a choice of handle and in various sizes, the comfortable handle and metal bar & rubber have been designed to remove water and cleaning fluid from a smooth surfaces. The water and soap solution applied to the glass/surface helps to release the dirt, the squeegee is then used to remove the water and dirt off the glass leaving a cleaner surface. All our squeegee's are suitable for use with our telescopic handles making it easy to reach high windows or tiles. There are several methods used for removing the fluid from surfaces. The fan or swivel method is used by professionals and uses strokes and turns in opposing directions to hold and move the water away from the edge of the squeegee. When completed there is no water or dirt left. Straight strokes are another option used more commonly. We also recommend Bamboo cloths are used to polish /touch up any spots that could be missed. Replacing a blade and/or rubber is quick and easy,

MONO ROLL CLOTHS ON A ROLL

These fantastic Extra Large Super Absorbent Cloths on a roll are made with non-woven fibres with a special pierced layer that grant an effective dirt collection and reduce the accidental tearing risk compared to paper. The Large cloth has an excellent absorbance capacity, a single cloth absorbs 16-20 ml, and provides a homogeneous solution release. The roll can be used with 4ltr bucket with hermetic cover and they can also be soaked with cleaning/disinfecting solution directly into the bucket and then used individually by pulling them out of the central opening of the cover, turning them into disinfectant, degreasing, or general cleaning wipes instantly depending on the solution used. Each Roll holds 90 cloths and each cloth is 12x12". As the buckets are reusable time and time again this makes these the most ECO Friendly cloths.

THE WIPEOUT SBF WASHROOM DISPENSER RANGE.

Wipeout have created a system of dispensers that comes from knowing throughout the years the issues that have been associated with other dispensers, taking this knowledge and finding a way to solve the issues.

The washroom range are ideal for anyone in the hospitality business, shopping Centres, Restaurants, Stadiums etc., Our dispensers are extremely durable and cope with very large volumes of customers, at the same time they are competitively priced and offer environmental credentials at the same time.

Our range of dispensers are not only attractive, but more importantly we will save you our customer not just money through running costs, but guarantee no embarrassing moments by running out of product. Check out our huge range of Washroom and Bathroom Cleaning Supplies below!

Our Wipeout dispensers boast a range of features that make them unique, they are made from abs plastic which is practically unbreakable, they also all use only one key for their modern lockable design which stops pilferage and reduces the need to carry around a bundle of different keys for different dispensers. They have a stylish visible viewing slot so the cleaner can see if the product needs replenishing without having to open the dispenser. The matching dispensers give a uniform look to your washroom and the bright white is easy cleaning with a rub of a cloth making your bathroom look and feel fresh. The dispensers also have an optional press down opening system when the key system is not required.

Dispensers in the Wipeout Range:

-  Wipeout Sensor Autocut Paper Dispenser
-  Wipeout Centerfeed Paper Dispenser
-  Wipeout ZFold Paper Dispenser
-  Wipeout Twin Toilet Roll Dispenser
-  Wipeout Push Button Cartridge Soap/Sanitiser Dispenser
-  Wipeout Push Button Bulk Fill Soap/Sanitiser Dispenser
-  Wipeout Automatic Soap/Sanitising Dispenser

 €22.00

TWIN TOILET ROLLS

Our twin toilet roll dispenser is designed to make savings and to reduce refilling times. We have created two toilet roll systems that make this happen. The 616 Eco-Fresh paper at 80 meters long it is 10% longer than the Baywest Toilet Roll, as our sheet count is 800 and theirs is 625. The second system designed for the twin roll dispenser is the Mega Compact Toilet Roll, each roll contains an amazing 125 meters of pure virgin toilet tissue. As our system is a twin toilet roll system you are not only guaranteed from any embarrassing run out, there is absolutely no wastage either.

CODE:
 SBF616 - 36 Rolls
 €48.00
 SBFMC - 24 Rolls
 €44.00

Toilet paper is a critical component of everyday hygiene. Did you know that one person can use over 15.7kg of toilet paper annually? We stock a large range of toilet rolls to suit all different dispensers, and although our twin toilet roll dispenser is the best value for money, and we recommend it, we make all other rolls available for the convenience of our customers. On an Environmental note not all toilet paper is equal, Virgin paper production is an environmentally responsible solution. With forest, water and energy conservation a top concern, virgin paper production must meet certain criteria in order to maintain its designation. All our virgin paper has the FSC label, which certifies that the paper and raw materials were sourced from sustainably managed forests. Virgin fibers create paper with higher absorbency rates, better ink color and retention, and softer and more durable options, thus making them a superior option in every sense.

STANDARD TOILET ROLL DISPENSERS

We have available for different settings different choices of toilet roll dispensers for use with domestic standard toilet rolls. ASH STAND LITTER BIN

These quality stainless steel litter ash stands are powder-coated inside and out then the coating is baked on in an oven to ensure no chipping of the litter ash stand. By oven baking, it also stops a longer life to the powder-coating. The Litter Ash Stands base is fitted with a protective rubber ring to ensure no damage or marking to the floor area. Each Litter Ash Bin Stand is finished with a polished chrome lid that is removable allowing for easy emptying of cigarette butts. Litter is easily removed from the Litter Ash Bin Stand by simply removing the chrome lid. There is an option to fix them to the ground securely. For Indoor/Outdoor use.

WHEELIE BIN PLASTIC 240LTR

The wheelie bins in our range of bins pay particular attention to areas of the container subjected to higher stresses during the lifting cycle, for example the front of the wheelie bin body and the wheels and axle supports. The unique shaping of our bins front wall significantly increases the overall strength and rigidity of the body. The wheelie bin is compliant with EN 840 and RAL and is "noise reduced" since it does not exceed an operating noise level of 92dB. The sturdy push handle and the two large wheels make it easy to move the wheelie bin around. The waste container is available in several different colours to facilitate waste sorting.
The dimensions of this bin is 240ltr - 580mm 740mm 1100mm.

TOP DOWN BUCKET

Multipurpose 20ltr bucket to be used alone or as an accessory in the TOP-DOWN® trolleys. This system allows the pre-impregnation of flat mop heads, The hermetic cover allows flat mop heads & cleaning solution set in the sealed bucket together to prepare them for wet mopping or disinfection. Those mop heads can then be used directly onto the floor and don't need any wringer. Can also be used with the optional sieve for even distribution of your chemical. Completely made of recyclable shock-proof plastic material

WRINGERS

The regular press down wringer comes in various colours for colour coded cleaning with this wringer the jaws go all the way down to the bottom of the wringer, allowing a perfect wringing both of string mops and flat mops alike.

The roller wringer has been conceived without a bottom in order to rinse and wring the flat mops directly through the wringer into the bucket, reducing working time and avoiding unpleasant dripping on the floor.

Our Side press wringers are made from shock proof plastic, and are suitable for use with either sting mops or flat mops. They are equipped with a side adjustable hook so to fix it steadily in the main structure.

All our wringers are compatible with our mops and mop buckets, for more information please contact the office.

Here at **Wipeout** we understand that there is not just one mop for everyone, and that many factors contribute to the choice of mopping system used in different premises and even from room to room. We of course carry a range of the more traditional Kentucky mops and Socket mops, but we also have flat mop systems and the increasingly more popular bucketless mop systems. Before we continue on the next few pages to outline all the mop holders and heads etc., available, let us take you through our flat and bucketless systems, with a little more information. If you need to know anything more please do not hesitate to contact our office where our very knowledgeable staff will be able to answer all your questions.

VELCRO MOP SYSTEM

Our fabulous Velcro Mop system is an extremely popular flat mop system because it is easy to use and suits most setting.

The Velcro mop system provides effective results, is quick and ergonomic and can be used with all mops with the velcro system. The special trapezoidal shaped mop holders allow the user to clean edges and hard to reach areas they are light and handy. The replaceable strips guarantee the utmost adherence of the mop holder to the mop for a perfect clean floor. These are made with recycled materials making them also a very eco friendly choice

Velcro System

NO-TOUCH SYSTEM

Velcrom mop easily removed with touching or wringing

NO FOAM

No foam construction reduces growth of bacteria and contaminants

REPLACEABLE VELCRO STRIPS

Replace only the strips, no the entire holder

HOW TO USE IT

Unsnap the cover of the TOP-DOWN® charging bucket and pick up the mop directly with the mop holder.

Start mopping and disinfecting the floor.

Hold mop ends with both feet and pull up the mop holder to remove the mop.

Throw the mop into the provided collection/waste bucket/bag, ready for washing

HOW TO REMOVE THE MOP

This system offers the following advantages:

- **less effort and fatigue** for the operator thanks to its lightness and simple use;
- **reduced costs** for the purchase of cleaning equipment thanks to the replaceable strips;
- **better performances:** excellent floor mopping and perfect cleaning of walls and skirting boards.

TOP-DOWN® MULTI-MOP CHARGING SYSTEM

PRE-MOISTENS MICROFIBER MOPS IN 30 MINUTES

- Up to 30 microfiber mops charged at one time
- Uses just 1.5 gallons of cleaning solution
- Ready to use in 30 minutes
- No trips to water source
- No touch, no wringing

EQUODOSE® SINGLE MOP, MOBILE CHARGING

ON-DEMAND, RAPID FLEXIBLE CHARGING

- Charge mops and/or cleaning cloths as needed
- Set desired saturation amount
- Consistent saturation

USE OF CLEAN, DRY MOPS & CLOTHS

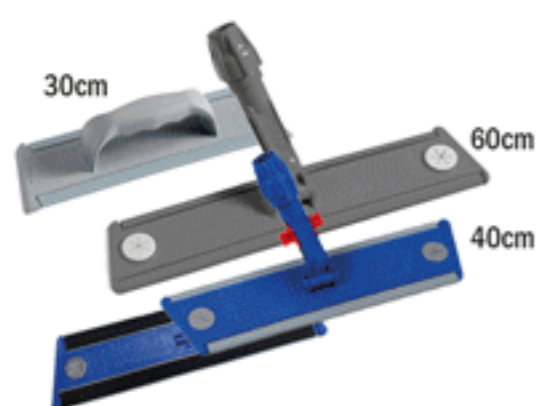

- Easy, fast spill clean-up
- Dry dusting (if needed)
- Charge for wet/ damp mopping/ cleaning

CONSERVE RESOURCES

- Refillable, sealed tanks don't waste chemicals
- Easy re-stocking of unused mops & cloths
- Less weight to carry = decreased worker strain

Prices exclude Vat.

VELCRO HOLDERS

The Velcro Mop System is a system that uses Velcro strips to hold your choice of mop head to the holder. We do several different holders that are compatible with all flat Velcro mop heads, the standard 40cm holder comes in durable, recyclable polypropylene. The 60cm holder also comes in recyclable polypropylene. All of these holders have a universal fitting which allows you to use any kind of handle with a diameter going from 20-24mm.

POCKET MOP SYSTEM

Thanks to the special fixing system of the mop to the frame the pocket system saves the operator from bending continuously to fix and drop the mop, avoiding direct contact of hands with dirty mops. the Pocket mop holder offers several advantages such as less fatigue and less effort., ergonomics, utmost hygiene and better cleaning results.

Our Pocket Mop is a completely new cleaning system, which can be used either for disinfection, or wet mopping, can be used a with "Regular" wringer, the presoak TopDown system or the Equodose charging system. It makes cleaning more comfortable: thanks to the special fixing clamp, it saves the operator from bending continuously while fixing or dropping the mop head, reducing labour time,with minimum effort thus saving costs.

HOW TO USE IT

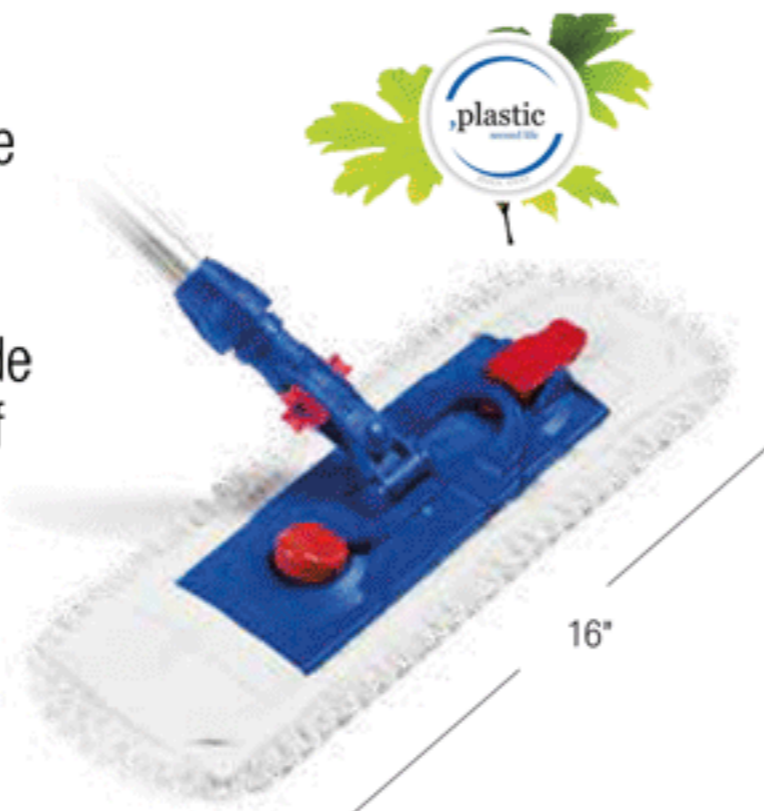

Patented Locking System: Easy-slide locking system for vertical cleaning.

Patented No Touch: Mop head secures into place with downward pressure.

To disengage: One side of mop is released as holder collapses with foot activation. The other side is released over dirty mop receptacle with push of button.

USE WITH FILMOP CHARGING SYSTEMS:

EQUODOSE **TOP-DOWN**

Insert the mop holder into the pre-soaked pocket mop

Start mopping the floor.

HOW TO REMOVE THE MOP

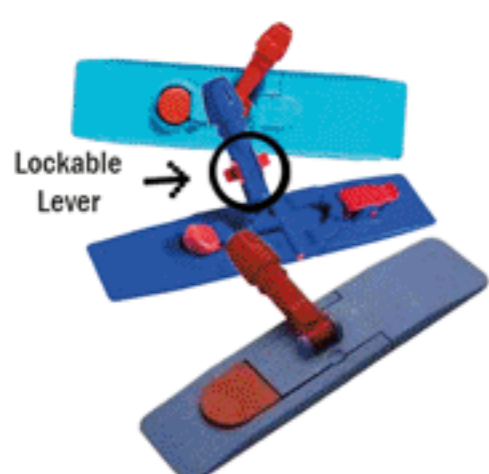

Open the mop holder by pushing the red foot-operated button

Drop the mop pushing the fixing clamp and throw it directly into the waste bag

POCKET HOLDERS

Our Pocket Mops fit on our 3 Pocket mop holders, the **Standard holder** the **Lockable holder** with integrated Lock System which can be switched on and off by simply pushing up or down its small lever (locking device) with one's foot, without the use of one's hands and without bending any more, and our uniuqic **Magnetic holder** which uses gentle magnetics for the clamping mechanism ensuring a secure fix.

LAUNDRY TIPS FOR MOPS

READ DIRECTIONS: Carefully follow the washing instructions on your detergent's packaging.

LAUNDRY IN NET BAGS: Mesh bags protect microfiber products from premature fiber break-down in the wash. See page 34.

WASH SEPERATELY: Do not wash or dry microfiber with other textiles as lint and fabric fibers with get caught in microfibers reducing their preformance.

DETERGENTS: Use textile detergents with a pH of less than 11.

NO SOFTENER: Softening agents clog the fiber's capillaries preventing proper solouion holding.

NO CHLORINE BLEACH: Chlorine bleach compromises the microfiber with polyamide. If necessary, use non-chlorine bleach.

STORE DRY: Store microfiber products in a dry enviroment. Moisture can result in mildew growth.

TUMBLE DRY 104°F MAX: High heat can melt the fibres, causing the microfiber to lose effectiveness.

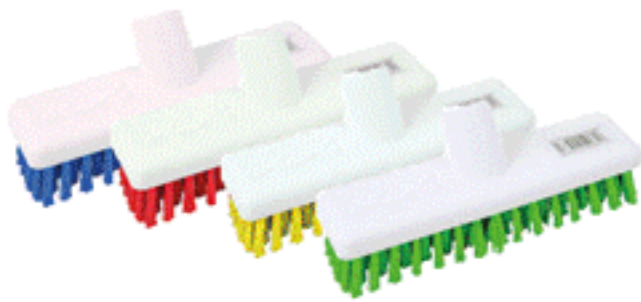

Prices exclude Vat.

HYGIENE BRUSHES

Our Hygiene brush's are manufactured to the highest standards possible for use within all areas of the food industry. GENERAL TROLLEYS

TOP DOWN BUCKET

Multipurpose 20ltr bucket to be used alone or as an accessory in the TOP-DOWN® trolleys. This system allows the pre-impregnation of flat mop heads, The hermetic cover allows flat mop heads & cleaning solution set in the sealed bucket together to prepare them for wet mopping or disinfection. Those mop heads can then be used directly onto the floor and don't need any wringer. Can also be used with the optional sieve for even distribution of your chemical. Completely made of recyclable shock-proof plastic material. The system also has a Rilsan coated trolley that can be fixed to the frame of the multipurpose trolleys for wet mopping and disinfection in hospitals, rest homes, clinics, etc., This Trolley is great alone or as part of the multipurpose trolleys.

The lithium-ion battery gives 45 minutes to 1hour of continuous and constant high velocity usage. Dimension: Length x width x height (cm)53X36X115

MACHINE ACCESSORIES.

PADS 17" FOR SCRUBBERS

A floor could take days to polish and it can take a few seconds to damage. Make sure that you know what you are doing and only use the right colour pad for the floor and outcome you want. The 17" black floor pad can be used daily on concrete floors, warehouses, factories, carparks, etc. The White floor pads can be used for dry polishing of most types of natural stone floors. Wash well the area that you plan to polish, allow to dry and then start buffing. The Colour of the pad denotes the abrasiveness the darker the pad the more abrasive it is. For more information or before you start scrubbing the floor, call us. We recommend **Floor Stripping:** Black, Brown, Green **Floor Maintaining:** Red, Blue, **Floor Polishing:** White, Horsehair, Tan.
